For light and heavy fabric

COMPUTERIZED LOCKSTITCH SEWING MACHINE A3

A3

COMPUTERIZED LOCKSTITCH SEWING MACHINE FOR LIGHT AND HEAVY FABRIC

German Design, Unique and Perfect

Advantages

For light and heavy fabric

Several hundred million invested production line

1 For light and heavy fabric, and function well

- From 2 layers of gauze to 16 layers of thin jeans can be sewing smoothly with beautiful stitches
- Optimized thread take-up-level crank changes the stroke of needle bar, making the thread collection, fabric penetrating, hook rotating match well and suitable for different materials
- Automatically assembly line with investment of several hundred million, combines with the German automotive technology, stable and reliable

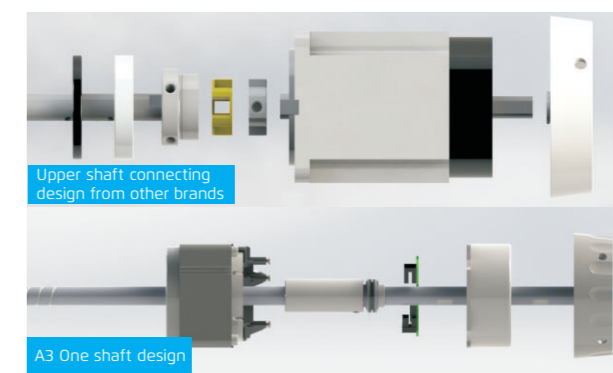

2 Easy to learn, easy to use

Long press about 3 seconds for factory reset, short press about 1 seconds for up and down needle position. Very easy to operate, no need to remember parameters

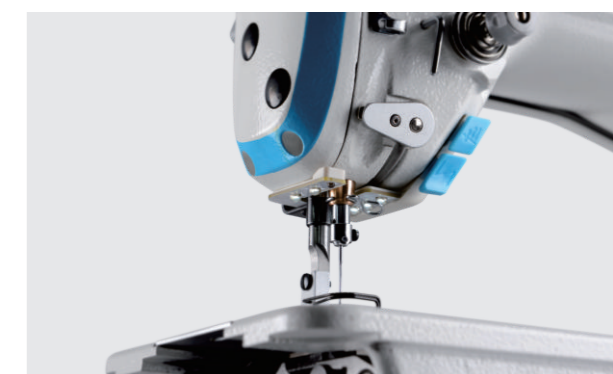

4 Cooling fan

Scientific design, vortex suction of cooling fan, reduce the temperature of motor and electronic control, improve greatly the lifespan of electronic components and avoids winding

3 One shaft design, peaceful and comfortable

One shaft design reduce the machine torque and makes feeding more smoothly. The light torque is leading in the industry and gives you a lighter and more comfortable feeling

5 Humanized design

Half stitch, LED lamp and reverse stitch these three functions in one and the unique LED lamp design give you a better sewing experience

Technical parameters
